Profile

Full-stack developer with six years of commercial software delivery across business platforms, integrations, mobile applications, logistics, manufacturing, workflow automation, e-invoicing, and document AI. I work from user-facing applications and APIs through integration, delivery, and release. I translate operational requirements into maintainable systems and take ownership across the delivery lifecycle.

Professional Experience

Xelto 2020–2026

Full-Stack Developer 2024–2026

- **Workflow** (React, TypeScript, REST APIs): Approval and business-process modules with configurable data, document handling, and operational actions.
- **e-Invoicing / KSeF** (React, TypeScript, .NET, XSLT/XML): Integration-rule, log, and PDF/XML document workflows for Polish e-invoicing.
- **Document AI / ICR** (React, TypeScript, PDF, JSON): Interfaces for PDF handling, prompt configuration, document analysis, and structured results.
- **XELapps and mobile** (React Native/Expo, Flutter, JWT): Platform setup and mobile workflows for users, applications, authentication, and business-process access.
- Maintained delivery pipelines, configuration, versioning, CI/CD workflows, and shared-package publishing.

Junior Frontend Developer 2020–2024

- **Xelcode** (React, JavaScript, Oracle JD Edwards): Scanner-driven warehouse and manufacturing applications with operational state, validation, printing, and ERP integration.
- Implemented process state, validation, barcode interaction, label printing, localisation, and API-connected operational screens.
- Maintained shared UI and API foundations used across commercial applications.

Freelance Web Development · Poznan, Poland May–August 2018

Built responsive single-page application components and improved scalability, performance, and search visibility.

Technologies

Languages: TypeScript, JavaScript, C#, Dart, Rust, Python, XSLT/XML
Platforms: React, Node.js, .NET, React Native/Expo, Flutter
Graphics: Three.js, WebGL, GLSL, Bevy, WebAssembly
Systems: REST APIs, JWT, n8n, Oracle JD Edwards
Delivery: GitHub Actions, CI/CD, npm packages, Vite

Selected Projects

MIBSI Cluster Bridge 2026

Java, Python, QNX, Android Auto, CarPlay · github.com/corashina/mibsi-cluster-bridge
Reverse-engineered tooling that bridges Android Auto and CarPlay navigation into Audi's Virtual Cockpit, with installation packaging and verification.

The Long Drive 2026

Rust, Bevy, Rapier, WebAssembly · github.com/corashina/the-long-slop
Browser recreation of the desktop driving-survival game, built in Rust with Bevy and Rapier physics and compiled to WebAssembly.

Don't Sleep With The Fishes 2026

TypeScript, Three.js, WebGL, GLSL · github.com/corashina/dont-sleep-with-the-fishes
Browser survival game about scavenging a sinking ship and managing a lifeboat while waiting for rescue.

Education

University of Southampton 2017–2020

BSc Computer Science

Poznan University of Technology 2016–2017

Information Engineering

Additional Information

Languages: Polish (native), English (fluent)
