PROFILE

Full-stack developer with six years at Xelto, building React and TypeScript applications, .NET integrations, and React Native and Flutter mobile apps. My work covers warehouse and manufacturing scanning, approval workflows, Polish e-invoicing (KSeF), and document AI. I build both the interface and the API behind it, and I maintain the CI/CD pipelines and shared npm packages that ship them.

PROFESSIONAL EXPERIENCE

Xelto

2020–2026

Full-Stack Developer 2024–2026

Stack: React, TypeScript, REST APIs, .NET, XSLT/XML, PDF, JSON, React Native/Expo, Flutter, JWT

- **Workflow.** Built configurable approval and business-process modules that handle documents.
- **e-Invoicing / KSeF.** Built screens for KSeF integration rules, logs, and PDF/XML invoice views, with XSLT rendering of invoice XML.
- **Document AI / ICR.** Built the interface where users upload PDFs, configure extraction prompts, and review the structured JSON results.
- **XELapps and mobile.** Built the platform's user and application setup and JWT sign-in, plus React Native/Expo and Flutter apps for business-process access.
- Maintained the GitHub Actions CI/CD pipelines, release versioning, and npm publishing for shared packages.
- Use AI coding agents (Claude Code) in daily delivery, with agent-written changes going through tests, CI and code review before release.

Frontend Developer 2020–2024

Stack: React, JavaScript, Oracle JD Edwards

- **Xelcode.** Built React scanner apps for warehouses and production lines, deployed at 12 client companies: barcode reading, per-step validation, label printing, and Oracle JD Edwards integration.
- Added localisation and multi-step process state to the scanner screens.
- Maintained the shared UI components and API code used across Xelto's products.

Freelance Web Development · Poznan, Poland

May–August 2018

Built responsive single-page application components and improved page speed and SEO.

TECHNOLOGIES

Frontend: React, TypeScript, JavaScript, Redux Toolkit, TanStack Query, Tailwind CSS, React Native/Expo, Flutter
Backend: C#, .NET, Node.js, REST APIs, JWT
Integrations: Oracle JD Edwards, KSeF, XSLT/XML, n8n
Testing: Playwright, Vitest, React Testing Library
Delivery: GitHub Actions, CI/CD, npm packages, Vite
Other: Python, Rust

PROJECTS

MIBSI Cluster Bridge

2026

Java, Python, QNX, Android Auto, CarPlay · github.com/corashina/mibsi-cluster-bridge

Reverse-engineered Audi's head unit to show Android Auto and CarPlay navigation in the Virtual Cockpit, and packaged an installer with verification checks.

The Long Drive

2026

Rust, Bevy, Rapier, WebAssembly · github.com/corashina/the-long-drive

Recreated the desktop driving-survival game for the browser in Rust, using Bevy and Rapier physics, compiled to WebAssembly.

EDUCATION

University of Southampton

2017–2020

BSc Computer Science

Poznan University of Technology

2016–2017

Information Engineering
