Profile

Full-stack developer with five years of commercial software delivery across business platforms, integrations, mobile applications, logistics, manufacturing, workflow automation, e-invoicing, and document AI. I work from user-facing applications and APIs through integration, delivery, and release. I translate operational requirements into maintainable systems and take ownership across the delivery lifecycle.

Education

University of Southampton BSc Computer Science	2017–2020
Poznan University of Technology Information Engineering	2016–2017

Professional Experience

Xelto Full-Stack Developer	2021–2026 2024–2026
- Delivered platform applications, integrations, reusable components, mobile experiences, and operational tooling. - Built administration, system setup, workflow approval, e-invoicing, document-processing, and document-AI interfaces. - Worked across React/TypeScript, REST/JWT, React Native/Expo, Flutter, .NET/C#, XSLT/XML, and integration tooling. - Maintained delivery pipelines, configuration, versioning, CI/CD workflows, and shared-package publishing.	
Junior Frontend Developer	2021–2024
- Built React/JavaScript applications for warehouse and manufacturing workflows on scanners and mobile devices. - Implemented process state, validation, barcode interaction, label printing, localisation, and API-connected operational screens. - Maintained shared UI and API foundations used across commercial applications.	
Freelance Web Development · Poznan, Poland	May–August 2018
Built responsive single-page application components and improved scalability, performance, and search visibility.	

Commercial Experience

Xelcode	2021–2026
React, JavaScript, Oracle JD Edwards Scanner-driven warehouse and manufacturing workflows with operational state, validation, printing, and ERP integration.	
Workflow	2024–2026
React, TypeScript, REST APIs Approval and business-process modules with configurable data, document handling, and operational actions.	
Document AI / ICR	2025–2026
React, TypeScript, PDF, JSON Interfaces for PDF handling, prompt configuration, document analysis, and structured results.	
e-Invoicing / KSeF	2024–2026
React, TypeScript, .NET, XSLT/XML Document and integration-rule workflows covering PDF/XML views, logs, and Polish e-invoicing processes.	
XELapps and mobile	2024–2026
React Native/Expo, Flutter, JWT Platform setup and mobile workflows for users, applications, authentication, and business-process access.	

Technologies

Languages: TypeScript, JavaScript, C#, Dart, XSLT/XML
Platforms: React, Node.js, .NET, React Native/Expo, Flutter
Systems: REST APIs, JWT, n8n, Oracle JD Edwards
Delivery: GitHub Actions, CI/CD, npm packages, Vite

Selected Projects

Endless City	September 2018
JavaScript, Three.js, WebGL, gITF Interactive infinite city scene with a custom gITF 2.0 loader.	
Flappy-Pixie	October 2018
JavaScript, Three.js, WebGL Flappy Bird-style game with a 3D parallax background, completed as a one-week interview challenge.	
Fitmed	July 2018
React, Redux, Node.js, Express, MongoDB Prototype platform for dietitians with API integration, authentication, and input validation.	

Additional Information

Languages: English, Polish
